To whom it may concern,

“Electric Pencil have been our graphic and web design partners since 2014 and have continuously provided us with creative ideas that wow our customers.”

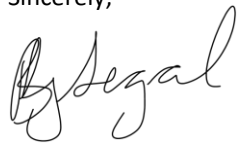

We have used Electric Pencil’s services to create workshop material, training guides, customer service process documentation and more related material. They have continuously delivered work that fits our corporate identity (having designed our logo for us) and assists us in the performance solutions we provide our clients. Serving large financial institutions means our work must always to be top notch and accurate. Electric Pencil meet these criteria consistently.

Their fast turnaround on changes and new briefs means we can capitalise on opportunities to gain new business and delight our current clients.

We have used Electric Pencil to design our website twice during our relationship with them. They also host our website on their cloud server which provides us with a fast and secure website that is always up to date.

Electric Pencil provide creative solutions to business needs that work! I recommend them to any company looking for a consistent and creative partner.

Sincerely,

Gary Segal,  
CEO, Game On Performance Solutions
